AIR QUEST® Green

People take about 28,800*¹
breaths a day - but is the air at
your home healthy to breathe?

In this forest, detoxifying particles
released from branches and leaves attach
to air pollutants and render them harmless.

This kind of natural air purification system
can be found in Hokkaido where the
Todomatsu conifer trees grow.

Co-developed with
S.T. Corporation

An AC filter that purifies the air like a forest.

Just stick it
in place!

Clear Forest is a line of products that utilize special "functional tree extract ingredients" extracted from Todomatsu conifer trees that have excellent air purifying properties, developed by the Japan Aroma Laboratory of the S.T. Group together with the Forest Research and Management Organization.

*1 Average for a person of 50kg body weight

Enjoy a deep breath of clean "forest air" ▶

Like a gentle forest wind

Purify the air at your home using the power of conifer trees from Hokkaido*2

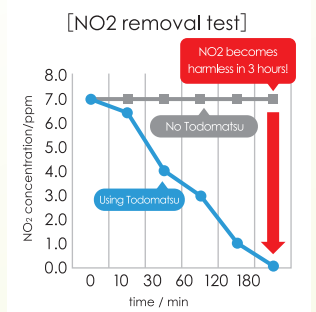

*2 Detoxification of NO2 that causes odor and air pollution

Forest air purification for your AC

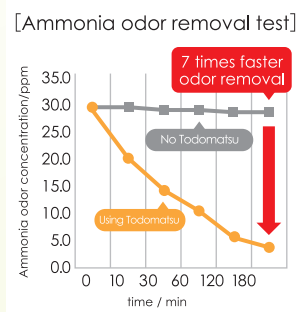

Nitrogen Dioxide (NO2) is one of the main substances that cause environmental pollution. And you are breathing it in with every breath.. We got the idea for how to improve air quality from the forest. The Todomatsu conifer

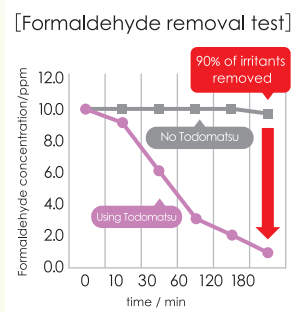

trees that grow in the forests of Hokkaido have the natural power to eliminate NO2 that is found in exhaust gas and PM2.5. With this natural forest air purification system, you can get rid of NO2 and odor at your home. The air from your AC will be like a gentle clean forest wind.

We used nonwoven filter fabric kneaded with fine Todomatsu powder. It was confirmed that NO2 that causes environmental pollution was rendered harmless in 3 hours.

We used nonwoven filter fabric kneaded with fine Todomatsu powder. It was confirmed that ammonia that causes bad smell was removed 7 times faster.

We used nonwoven filter fabric kneaded with fine Todomatsu powder. It was confirmed that formaldehyde that is an irritant found in adhesive and paint used around the house was reduced by 90% in 3 hours.

The AC air current becomes like a gentle forest wind

Benefiting both the forest and people

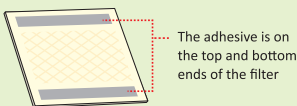

Forest thinning encourages the trees to grow and brings merit to both the forest and people. 'AIR QUEST' Green' utilizes forest branches and leaves that remained unused before. By noticing this new value in something unused previously, the local employment and economy also benefit. And that cycle leads to forest growth again.

The material for this product includes thinned wood from Hokkaido.

How to use AIR QUEST® Green

1 Confirm the adhesive part and attachment position

*Image is for illustration only

⚠ Please make sure the target surface for attaching the filter is clean by wiping away any dirt on the AC panel and vent.

Stick the adhesive part of the filter to the flat panel portion of the AC. If the adhesive part covers the vent, the filter might peel off, so please check the correct position in advance.

2 Stick the filter to the AC and check that it is firmly in place

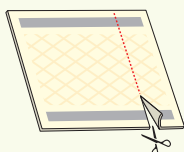

Cover the entire AC vent with AIR QUEST Green, and stick it in place, gradually removing the backing paper. Please make sure the filter is properly attached, pressing it against the AC so no gaps remain.

Estimated Usage Term

Change the filter when it becomes dirty enough for the line pattern to stand out clearly. The estimated usage term varies depending on the surrounding environment.
*Image is for illustration only.

Cut to fit the size of your AC

You can adjust the size of AIR QUEST Green yourself. Cut it with scissors to fit the size of your AC vent.

*The entire sheet has an adhesive finish. When cutting, please insert scissors perpendicularly to the upper and lower thick glue lines.

Product Specifications

	AIR QUEST® Green 57	AIR QUEST® Green 38
Product Name	AIR QUEST® Green 57	AIR QUEST® Green 38
Product Number	AQG1-01-01	AQG1-01-02
Included	Filter (nonwoven fabric) 2 pcs	Filter (nonwoven fabric) 2 pcs
Size	57cm×57cm	38cm×80cm
JAN Code	4571103701355	4571103701362
Manufacturer	Japan	Japan
